Certified Multi-national Travel Expert

Chief Executive Officer

Introduction:

Let me break down this long-standing perception or belief that travelling abroad is a hard adventure. In fact, it is one of the simplest adventures one can take in life. You may believe that it is difficult, especially when you are doing it for the first time, and do not have enough information on what you are going in for.

This quick guide gives you the most reliable ways to travel abroad. Although you may be familiar with these means, it may not be that smooth as getting the right opportunities is even more challenging. But as I mentioned, knowledge is everything you need.

To get the most benefit from this guide, turn off all distractions and read to the end.

Below are the 5 most reliable ways to travel for greener pasture.

1) Education

One of the easiest ways to travel abroad is through education, although many people do not know this. There are millions of education opportunities around the world. There are daily scholarships offered by universities all around the world. Some of these are fully sponsored, while others are partially sponsored by the university. Other study programs are entirely the responsibility of the applicant. Whichever you take, the benefits are almost the same.

Knowing which programs are good, which matches your academic profile, and the accommodation conditions suitable for you are the important things you have to consider while looking for international education programs. There are reliable international travel agencies and embassies that you can reach out to for reliable information.

2) Work

International work openings and opportunities are boundless. There is an ever-growing demand for skilled and unskilled workers in most countries around the world. Travelling abroad for work will largely depend on the skills you possess, and the quality of employer or credibility of companies you get in contact with. International organizations also have great opportunities to employ people and assign them on different missions out of their countries of birth or origin.

3) Tourism

Tourism is one of the easiest ways to travel abroad for a brief stay, usually within weeks or a few months. There are endless tourist visa opportunities for you, and you can probably fit into several of them. Although it may require some significant financial sacrifices, it is worth it. Almost every country in the world welcomes tourists on a daily basis. Some of the world's most visited touristic countries in the world are: France, Spain, United States, China, Italy, Dubai and Germany. Some people travel abroad as tourists, but convert their visas to work, and sometimes on a permanent basis. So it is very possible to switch visa types once you arrive in the destination country.

4) Conference

International conferences are another great way to travel abroad. For academics, scholars and researchers, travelling to international conferences means sharing ideas, accessing new resources and expertise and, of course, eating free pastries.

Continuing your studies beyond the undergraduate (1st degree) level opens up many new opportunities, but one of the most exciting is attending international conferences. Along with meeting scholars from around the world, it's a chance to visit historic sites and discover country-specific resources relevant to your work. People who have shown great strides in their fields of interest, as well as eager individuals ready to engage in further education and research are always a better fit for international conferences.

5) Asylum

The right of asylum is an ancient juridical concept, under which people persecuted by their own rulers might be protected by another sovereign authority. So asylum is a universal human right. When you feel insecure in your own country, or when you are pushed out by a social or political crisis, you can seek asylum or protection in any country of your choice. Many people who are granted asylum always end up taking these new destinations as their permanent homes.

One Last Thing for You

While there are countless opportunities to travel abroad, most of these opportunities are always hidden from the public.

Most people not only have difficulties finding the right opportunities but also get overwhelmed with the tedious tasks involved in travel procedures from office to office and through embassies.

And this is where our travel consultants come in.

Book a free consultation session with one of our experts, so that we help you find the right opportunities and country that meets your needs.

Our company, **Travels and Jobs International Consulting** is a legally recognized international travel and consulting agency that has helped over 10,000 Cameroonians and other internationals to travel to their dream countries for greener pastures.

We have partnerships with more than 500 universities, companies and airlines in various countries.

For a limited time, we are giving out a few spots for free consultations. Book now before spots for this month are all taken.
